Summary

Software engineer with 5+ years of experience building scalable cloud applications using Java-Spring Boot, Docker, and Kubernetes. Proficient in frameworks including Spring, Vue.js 3, Django, and Express.js. Open-source contributor with a strong foundation in data structures and algorithms. CCNAv7 certified and passionate about learning new technologies to solve real-world, client-focused problems.

Experience

RedDot Digital Limited, Robi Axiata

Feb 2025 – Present

Senior Software Engineer

Dhaka, Bangladesh

- **MFS - Mobile Financial Service:** Designed and implemented a custom SAGA-based distributed transaction system, ensuring consistency across services.
- Built and integrated Bangla QR payment and multi-wallet architecture for flexible financial operations.
- Developed real-time commission management system with high accuracy and scalability.
- Ensured balance consistency across services in a distributed environment using Java, Spring Microservices, Kafka, Redis, Postgresql, Docker, Kubernetes.
- Integrated with third-party aggregators for bill payments (DESCO, NESCO, BDGCL, PRAN, etc.).
- Contributed to scalable, high-availability microservices architecture in a fintech domain.

Reve Systems Ltd.

Sep 2021 – Jan 2025

Software Engineer

Dhaka, Bangladesh

- **Instant Messaging (Alaap BTCL):** Managed 6 microservices to bolster a chat application's functionalities using Java, Kafka, Docker, Redis, Scylladb, Kubernetes.
- **REVE SMS-SMS Gateway:** Led migration from Struts/JSP to Spring Boot 3, Spring Security 6, and Vue.js 3.
- Optimized SMS CDR processing and reporting, significantly improving download performance.
- Implemented SMPP and HTTP configurations for seamless SMS delivery and designed scalable database schema for large-scale data summarization.
- Built auto report generation, invoicing, and alerting systems; deployed and managed applications in Linux-based production environments.
- **Indian-Airtel-Customer Portal:** Developed reusable Maven-based modular components for cross-project integration.
- Enhanced system performance using Redis and Lua scripting, and implemented trouble ticket system integrated with external Siebel systems.

Education

Khulna University of Engineering & Technology

Khulna, Bangladesh

B.Sc. Eng. in Computer Science Engineering (CGPA: 3.64)

Feb 2017 – Mar 2022

Projects

IVR and Call Center

- Inbound and outbound call generation with Asterisk open-source project. ARI-based Java application with call routing ruling.

Email Verifier Tool With Golang

- Pet project built efficiently in Golang for email verification.

Computer Interaction System by Hand Gesture

- Using 2D CNN Deep Learning with IoT. Controlled computer without physical touch using specific hand gestures via IPCV, TensorFlow, Python, and tkinter.

Treasure Hunting 3D Game

- Built using OpenGL, Glut, Glu Library, C++ for roaming in 3D areas and finding hidden treasure using game hints.

Real Estate Business Website

- Django, Python-backed, PostgreSQL website featuring an admin panel and GUI for buying/selling houses.

Additional Experience, Awards & Certifications

- **Open Source:** Contributor to Apache Fineract and Java Design Patterns.
- **Certifications:** CCNAv7 Cisco Certified Network Associate (Letter of Merit), **Google IT** Support Professional, KodeKloud-Certified Kubernetes Certification (In Progress).
- **Awards:** ITEE **Full Passer (10th position)**, Cisco National Skill Competition (Final Round), Intra KUET Programming Contest (11th position).
- **Competitive Programming:** Codeforces rating 1373 (377+ solved), Codechef rating 1595 (Global rank 231).

Skills

Languages & Frameworks: Java, Spring Boot, Vue.js, Django, Express.js, Flutter, C++, Python, Golang, Lua

Databases: PostgreSQL, MySQL, Redis, MongoDB, ScyllaDB

Tools & Infrastructure: Docker, Kubernetes, Kafka, Linux, Asterisk, SMPP, HTTP

Machine Learning & Data Science: Scikit-learn, TensorFlow, OpenCV, NumPy, Matplotlib, NLP, CNN
